

Built in Technology for your New Home

Redrow have teamed up with Home Technology specialists Hip Smart Home to ensure your new Redrow home truly is a home for the future.

Designed specifically for new homes these discrete Smart Home options are built in at the wiring stage to ensure your new home remains cable and clutter free.

High-fidelity Music / Radio is delivered to the Kitchen / Family Area, Lounge and Master Bedroom through discreet in ceiling speakers from a neat central hub tucked away under the stairs.

- Play different music in every room or group rooms together in party mode.
- All your favorite music is right at your fingertips with easy access to networked Computers/Hard Drives, Streaming Internet Radio and On-Line Music Services as well as music stored on any Android or Apple iOS device.
- Control what's playing, in what room, from the palm of your hand with the free app for your Apple or Android device. Just search for Nuvo Player to check out the app.

Note : This system is powered by the Legrand NuVo® P3100 Professional Series Multiroom Music System.

hip SmartHUB

www.hipsmarthome.co.uk

This smart Home Network Hub, houses your Wireless Broadband Router out of sight under the stairs and feeds three hard wired network points which provide a high speed plug and play network connection for your Smart TV, Games Console or any other Network Connectable Device.

Why do I need this ?

Almost all new TVs, Set Top Boxes and Games Consoles etc. have a Network (ethernet) port on the back which enables them to connect to on line services such as Catchup TV, Netflix, Skype and the Internet. Whilst many of these devices can also connect wirelessly a hardwired connection will always be many times quicker and more reliable resulting in less buffering and connection problems. Even more important now with Ultra HD Streaming movies available from Netflix and other providers.

The Network Points are located adjacent to the TV Points in the Living Room, Kitchen / Family Area and the Master Bedroom.

hip SmartTV

www.hipsmarthome.co.uk

This is an add on to the Smart Hub, providing upto six additional Network Points adjacent to your standard TV Aerial Points enabling a whole host of services to all of your Smart TVs, Games Consoles etc.
